

Larry DeVivo Consultant Services:

Along with the benefit of a proper listening environment and an experienced engineer, who knows his room and system incredibly well, you also get an industry veteran who has been involved in every aspect of the music and recording production and who knows what to listen for... in multiple genres.

I have been providing this service to repeat customers for years, some of the biggest names in the business right down to the new musician/engineer just starting out.

Some Details: For mixing and/or mastering I evaluate on the full range system in the mastering room and the near field environment in the mixing room. For mixes I run it through the mastering console to see how your mix will handle commercial mastering. I check for overall balance of highs, mids, low, impact, detail, masking and other anomalies that can occur. I write a detailed evaluation with suggestions that may help to overcome these problems and sometimes I just have to give the big thumbs up or unfortunately the much needed reality check but this is very, very rare, Honesty is key to truly serve the song. What needs to be done is very much program dependent. Communication of goals is a key aspect of this service. Just tell me what your thinking and the dialog has begun... this service starts for just 15.00 (or less) per song. Please see our rates and upload page for more details.
